

EXPERIMENT-8

ROLL NO: 240701058

NAME: ASHWIN C

USER INTERFACE AND DESIGN

AIM:

The aim is to create storyboards representing the user flow for a Foodie App mobile application using Balsamiq.

Procedure:

1. Tool Used: Balsamiq Wireframes (<https://balsamiq.com>)
2. Created a new project and added mobile screens to simulate the user's food ordering experience.
3. Each screen represents a key step in browsing food categories, viewing menu items, managing the cart, and placing orders.
4. UI components like buttons, text fields, icons, and product cards were used from the Balsamiq library.
5. Designed wireframes to be simple, clean, and user-friendly for a seamless food ordering experience.

User Flow:

1. Home Screen – Users can search for food and browse different cuisine categories.
2. Menu Screen – Displays a list of food items with names, prices, and Add to Cart buttons.
3. Shopping Cart Screen – Allows users to review selected items, adjust quantities, and see the price breakdown.
4. Checkout Screen – Users enter delivery address, contact number, select payment method, and place their order.
5. Order Confirmation Screen – Displays order success message with estimated delivery time.

1. Home Screen

Components:

- Navigation bar with "Foodie App" title.
- Search bar for users to find specific food items.
- Category buttons: Italian, Mexican, Indian, Chinese, Desserts, Beverages.

Purpose: Acts as the main landing page for users to discover different food categories and begin their ordering journey.

Figure 1: Home Screen – Search and Category Selection

2. Menu Screen

Components:

- Search bar for finding specific menu items.
- Category filter buttons (Category 1, Category 2, Category 3).

- Food item cards containing item names and prices (e.g., Food Item 1: \$12.00, Food Item 2: \$8.50).
- Green "Add to Cart" action buttons for each food item.

Purpose: Provides a detailed menu view allowing users to browse food items, see pricing, and add desired items to their shopping cart.

Figure 2: Menu Screen – Food Items with Prices and Add to Cart

3. Shopping Cart Screen

Components:

- Itemized list of selected products (Item 1: \$10.00, Item 2: \$15.00).
- Quantity (Qty) controls with plus and minus buttons for each item.
- Unit Price and Total Price per line item.

- Grand Total calculation (\$40.00).
- Blue "Checkout" button to proceed to payment.

Purpose: Allows users to manage their food selections, adjust quantities, and review the final cost before proceeding to checkout.

Figure 3: Shopping Cart Screen – Item Review and Checkout

4. Checkout Screen

Components:

- Delivery Address input field (placeholder: "Enter your address").
- Contact Number input field (placeholder: "Enter your contact number").
- Payment Options: Cash and UPI radio button selectors.
- Green "Place Order" confirmation button.

Purpose: Collects necessary delivery and payment details to finalize the food order transaction.

The screenshot displays the 'Foodie App' checkout interface. It features a title bar 'Foodie App' and a section header 'Checkout'. Below this, there are three input fields: 'Delivery Address:' with the placeholder 'Enter your address', 'Contact Number:' with the placeholder 'Enter your contact number', and 'Payment Options:' with two radio buttons labeled 'Cash' and 'UPI'. A prominent green button labeled 'Place Order' is positioned at the bottom of the form. To the right of the app interface, a yellow callout box titled 'Checkout Screen' contains the text: 'The checkout screen provides input fields for delivery details and payment'.

Figure 4: Checkout Screen – Delivery and Payment Details

5. Order Confirmation Screen

Components:

- Green checkmark icon indicating successful order placement.
- "Order Confirmed!" success message.
- Confirmation text: "Your order has been placed successfully."
- Estimated delivery time: 30-45 minutes.

Purpose: Provides confirmation and reassurance to the user that their food order has been successfully placed, along with expected delivery timing.

Figure 5: Order Confirmation Screen – Success Message and Delivery Estimate

Final Result:

- The wireframes successfully represent a Foodie App, showing how users can:
- Search and browse different food categories.
- View detailed menu items with pricing and add them to cart.
- Manage a digital shopping cart with quantity controls.
- Complete a structured checkout process with delivery and payment details.
- Receive order confirmation with estimated delivery time.
